PROJECTS

1.Fake Drug Detection using Blockchain   -3 months

Technologies Used: Block Chain,Smart Contracts.

This project addresses a critical issue in the pharmaceutical industry, which is the proliferation of counterfeit drugs.

It is a quick response (QR) code that can be verified by consumers and differentiated from counterfeits.

1.Weapon Detection using Machine Learning and Deep Learning.   -3 months

Technologies Used: SSD Algorithm, Faster RCNN, YOLO Algorithm. Weapon Detection implements automatic weapon detection using a Convolution Neural Network (CNN) based SSD and Faster RCNN algorithms.

The primary goal of this project is to enhance security and public safety by automating the process of detecting weapons in real-time or through the analysis of recorded data, such as video feeds or images.
